

## Manufactured by Winechek Pty Ltd

# Vintessential L-Lactic Acid Analysis Kit vial 1 Winechek

Chemwatch: 36-8132 Version No: 5.1

Safety Data Sheet according to Work Health and Safety Regulations (Hazardous Chemicals) 2023 and ADG requirements

Chemwatch Hazard Alert Code: 0

Initial Date: **08/30/2013** Revision Date: **12/23/2022** Print Date: **08/28/2025** L.GHS.AUS.EN.E

## SECTION 1 Identification of the substance / mixture and of the company / undertaking

| Product name                  | Vintessential L-Lactic Acid Analysis Kit vial 1 |
|-------------------------------|---|
| Chemical Name                 | Not Applicable                                  |
| Synonyms                      | Not Available                                   |
| Chemical formula              | Not Applicable                                  |
| Other means of identification | Not Available                                   |

#### Relevant identified uses of the substance of mixture and uses advised against

| Relevant identified uses | General laboratory reagent. |
|--------------------------|-----------------------------|
|--------------------------|-----------------------------|

#### Details of the manufacturer or importer of the safety data sheet

| Registered company name | Winechek                                     |
|-------------------------|--|
| Address                 | 10 Kalimna Road, Nuriootpa SA 5355 Australia |
| Telephone               | +61 8 8360 2200                              |
| Fax                     | Not Available                                |
| Website                 | Not Available                                |
| Email                   | support@winechek.com                         |

## **Emergency telephone number**

| Association / Organisation          | Poisons Information Centre |
|-------------------------------------|----------------------------|
| Emergency telephone number(s)       | 13 11 26                   |
| Other emergency telephone number(s) | Not Available              |

### **SECTION 2 Hazards identification**

#### Classification of the substance or mixture

| Poisons Schedule   | Not Applicable  |
|--------------------|---|
| Classification [1] | Non hazardous   |
| Legend:            | 1. Classified by Chemwatch; 2. Classification drawn from HCIS; 3. Classification drawn from Regulation (EU) No 1272/2008 - Annex VI |

## Label elements

| Hazard pictogram(s) | Not Applicable |
|---------------------|----------------|
|                     |                |
| Signal word         | Not Applicable |

## Hazard statement(s)

Not Applicable

## Precautionary statement(s) Prevention

Not Applicable

## Precautionary statement(s) Response

Not Applicable

## Precautionary statement(s) Storage

Not Applicable

Precautionary statement(s) Disposal

## Vintessential L-Lactic Acid Analysis Kit vial 1

Initial Date: **08/30/2013**Revision Date: **12/23/2022** 

Print Date: 08/28/2025

Not Applicable

Version No: 5.1

No further product hazard information.

## **SECTION 3 Composition / information on ingredients**

## Substances

See section below for composition of Mixtures

#### **Mixtures**

| CAS No        | %[weight] Name  |  |
|---------------|---|--|
| Not Available | ingredients determined not to be hazardous  |  |
| Legend:       | 1. Classified by Chemwatch; 2. Classification drawn from HCIS; 3. Classification drawn from Regulation (EU) No 1272/2008 - Annex VI; 4. Classification drawn from C&L * EU IOELVs available |  |

#### **SECTION 4 First aid measures**

#### Description of first aid measures

| Eye Contact  | If this product comes in contact with eyes:  Wash out immediately with water.  If irritation continues, seek medical attention.  Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|--------------|--|
| Skin Contact | If skin or hair contact occurs:  Flush skin and hair with running water (and soap if available).  Seek medical attention in event of irritation.   |
| Inhalation   | <ul> <li>If fumes, aerosols or combustion products are inhaled remove from contaminated area.</li> <li>Other measures are usually unnecessary.</li> </ul>  |
| Ingestion    | <ul> <li>Immediately give a glass of water.</li> <li>First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.</li> </ul>  |

#### Indication of any immediate medical attention and special treatment needed

Fire Incompatibility Avoid contamination with strong oxidising agents as ignition may result

Treat symptomatically.

## **SECTION 5 Firefighting measures**

## Extinguishing media

- ▶ There is no restriction on the type of extinguisher which may be used.
- Use extinguishing media suitable for surrounding area.

## Special hazards arising from the substrate or mixture

| Advice for firefighters |  |
|-------------------------|--|
| Fire Fighting           | <ul> <li>Use water delivered as a fine spray to control fire and cool adjacent area.</li> <li>Do not approach containers suspected to be hot.</li> <li>Cool fire exposed containers with water spray from a protected location.</li> <li>If safe to do so, remove containers from path of fire.</li> <li>Equipment should be thoroughly decontaminated after use.</li> </ul> |
| Fire/Explosion Hazard   | <ul> <li>Non combustible.</li> <li>Not considered a significant fire risk, however containers may burn.</li> <li>Decomposition may produce toxic fumes of:</li> <li>carbon dioxide (CO2)</li> <li>nitrogen oxides (NOx)</li> <li>other pyrolysis products typical of burning organic material.</li> </ul>  |
| HAZCHEM                 | Not Applicable   |

## **SECTION 6 Accidental release measures**

## Personal precautions, protective equipment and emergency procedures

See section 8

## **Environmental precautions**

See section 12

## Methods and material for containment and cleaning up

| methods and material for containment and cleaning up |  |  |
|--|--|--|
| Minor Spills   | <ul> <li>Clean up all spills immediately.</li> <li>Avoid breathing vapours and contact with skin and eyes.</li> <li>Control personal contact with the substance, by using protective equipment.</li> <li>Contain and absorb spill with sand, earth, inert material or vermiculite.</li> <li>Wipe up.</li> <li>Place in a suitable, labelled container for waste disposal.</li> </ul>   |  |
| Major Spills   | <ul> <li>Clear area of personnel and move upwind.</li> <li>Alert Fire Brigade and tell them location and nature of hazard.</li> <li>Control personal contact with the substance, by using protective equipment.</li> <li>Prevent spillage from entering drains, sewers or water courses.</li> <li>Recover product wherever possible.</li> <li>Put residues in labelled containers for disposal.</li> <li>If contamination of drains or waterways occurs, advise emergency services.</li> </ul> |  |

Version No: 5.1

#### Vintessential L-Lactic Acid Analysis Kit vial 1

Initial Date: 08/30/2013 Revision Date: 12/23/2022 Print Date: 08/28/2025

Personal Protective Equipment advice is contained in Section 8 of the SDS.

#### **SECTION 7 Handling and storage**

## Precautions for safe handling

- Limit all unnecessary personal contact.
  - ▶ Wear protective clothing when risk of exposure occurs.
  - Use in a well-ventilated area.
  - When handling DO NOT eat, drink or smoke.
  - Always wash hands with soap and water after handling.
  - Avoid physical damage to containers.
  - Use good occupational work practice.
  - Observe manufacturer's storage and handling recommendations contained within this SDS.

#### Other information

Safe handling

- Store in original containers.
- Keep containers securely sealed. Store in a cool, dry, well-ventilated area.
- Store away from incompatible materials and foodstuff containers.
- Protect containers against physical damage and check regularly for leaks.
- ▶ Observe manufacturer's storage and handling recommendations contained within this SDS.

## Conditions for safe storage, including any incompatibilities

| Suitable container      |  |
|-------------------------|--|
| Storage incompatibility |  |

▶ Glass container is suitable for laboratory quantities

Avoid contamination of water, foodstuffs, feed or seed

▶ Avoid reaction with oxidising agents

## SECTION 8 Exposure controls / personal protection

#### **Control parameters**

Occupational Exposure Limits (OEL)

INGREDIENT DATA

Not Available

| Ingredient   | Original IDLH | Revised IDLH  |
|--|---------------|---------------|
| Vintessential L-Lactic Acid<br>Analysis Kit vial 1 | Not Available | Not Available |

#### MATERIAL DATA

#### **Exposure controls**

| Appropriate engineering controls  | Use in a well-ventilated area  |
|---|--|
| Individual protection<br>measures, such as personal<br>protective equipment |  |
| Eye and face protection   | No special equipment for minor exposure i.e. when handling small quantities.  OTHERWISE:  Safety glasses with side shields.  Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly. [CDC NIOSH Current Intelligence Bulletin 59], [AS/NZS 1336 or national equivalent] |
| Skin protection   | See Hand protection below  |
| Hands/feet protection   | No special equipment needed when handling small quantities.  OTHERWISE: Wear chemical protective gloves, e.g. PVC.   |
| Body protection   | See Other protection below   |
| Other protection  | No special equipment needed when handling small quantities.  OTHERWISE:  Overalls.  Barrier cream.  Eyewash unit.  |

## Respiratory protection

None under normal operating conditions.

## **SECTION 9 Physical and chemical properties**

## Information on basic physical and chemical properties

| Appearance     | Clear alkaline liquid; mixes with water. |   |               |
|----------------|--|---|---------------|
| Physical state | Liquid                                   | Relative density (Water = 1)            | Not Available |
| Odour          | Not Available                            | Partition coefficient n-octanol / water | Not Available |

## **SECTION 10 Stability and reactivity**

| Reactivity                         | See section 7  |
|------------------------------------|--|
| Chemical stability                 | Stable for up to 12 months if kept in fridge @ 4C.  Unstable in the presence of incompatible materials.  Product is considered stable.  Hazardous polymerisation will not occur. |
| Possibility of hazardous reactions | See section 7  |
| Conditions to avoid                | See section 7  |
| Incompatible materials             | See section 7  |
| Hazardous decomposition products   | See section 5  |

## **SECTION 11 Toxicological information**

| Information on | toxicological | effects |
|----------------|---------------|---------|
|                |               |         |

| Information on toxicological ef         | fects  |   |  |  |
|---|--|---|--|--|
| a) Acute Toxicity                       | Based on available data, the classification criteria are not met.  |   |  |  |
| b) Skin Irritation/Corrosion            | Based on available data, the classification criteria are not met.  |   |  |  |
| c) Serious Eye<br>Damage/Irritation     | Based on available data, the classification criteria are not met.  |   |  |  |
| d) Respiratory or Skin<br>sensitisation | Based on available data, the classification criteria are not met.  |   |  |  |
| e) Mutagenicity                         | Based on available data, the classification criteria are not met.  |   |  |  |
| f) Carcinogenicity                      | Based on available data, the classification criteria are not met.  |   |  |  |
| g) Reproductivity                       | Based on available data, the classification criteria are not met.  |   |  |  |
| h) STOT - Single Exposure               | Based on available data, the classification criteria are not met.  |   |  |  |
| i) STOT - Repeated Exposure             | Based on available data, the classification criteria are not met.  | Based on available data, the classification criteria are not met. |  |  |
| j) Aspiration Hazard                    | Based on available data, the classification criteria are not met.  |   |  |  |
| Inhaled                                 | Not normally a hazard due to non-volatile nature of product  |   |  |  |
| Ingestion                               | The material has <b>NOT</b> been classified by EC Directives or other classification systems as "harmful by ingestion". This is because of the lack of corroborating animal or human evidence. The material may still be damaging to the health of the individual, following ingestion, especially where pre-existing organ (e.g liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern. |   |  |  |
| Skin Contact                            | The material is not thought to produce adverse health effects or skin irritation following contact (as classified by EC Directives using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.  |   |  |  |
| Eye                                     | Although the liquid is not thought to be an irritant (as classified by EC I discomfort characterised by tearing or conjunctival redness (as with wire  |   |  |  |
| Chronic                                 | Long-term exposure to the product is not thought to produce chronic effects adverse to health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course.   |   |  |  |

| Revision Date | 12/23/2022 |
|---------------|------------|
| Initial Date  | 08/30/2013 |

## **SDS Version Summary**

| Version | Date of Update | Sections Updated   |
|---------|----------------|--|
| 4.1     | 11/01/2019     | One-off system update. NOTE: This may or may not change the GHS classification |
| 5.1     | 12/23/2022     | Classification review due to GHS Revision change.                              |

## Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
